

6-in-1 Slim Vacuum Cavitation RF Laser Beauty Machine

Benefits of Lipo Laser

It adopts the latest innovation in non-surgical, non-invasive laser lipolysis. Lipo laser emits low levels of laser energy which creates a chemical signal in the fat cells breaking down the stored triglycerides into free fatty acids, glycerol and water molecules. This is similar to the natural response initiated by the body when it needs to use its stored energy reserves. These free fatty acids is then transported throughout the body by the lymphatic system to supply the body with energy. Again just as the body would respond in times of caloric scarcity.

A period of exercise in post treatment would ensure the complete metabolism of these free fatty acids. Shrinking the fat cells and delivering the body shape result our patients are looking for. The laser treatment is a non-destructive methodology aimed at targeted fat reduction which means excess fat deposits can be treated anywhere on the body and the fat cells are not destroyed as a result of the treatment. Targeted fat reduction and circumferential reduction has many advantages over other body shaping technologies. Here are just a few!

Handles included

40K Cavitation Handle

With collective strong sound wave head, strong sound wave of 40KHZ are emitted to human body for impacting fat cells fiercely and causing friction motion between fat cells. This may cause effective consumption of calories and moisture in fat cells and reduce the size of fat cell.

Vacuum Bipolar RF Handle

Dissolve fat, enhance lymphatic drainage, firm skin and improve skin elasticity. Body-shaping equipment that adopts the most advanced high-speed turbine negative pressure technology and innovative three-dimensional conversion technology combining with microcomputer chip controlled patent roller axis.

Sextuple Body RF Handle

Being integrated with the advanced RF technology, the instrument can directly reach the deep-seated fat layer with the incisive positioning ability of RF. In the fast-active state, fat cell tissue may generate friction heat, increase local temperature and remove excess fat and toxin from the body through sweat gland, clientele-patic circulation and lymph.

Laser Pads

Diode Lipo Laser emits low levels of laser energy which creates a chemical signal in the fat cell, breaking down the stored triglycerides into free fatty acids and glycerol and releasing them through channels in the cell membranes. The fatty acids and glycerol are then transported around the body to the issues that will use them during metabolism to create energy.

Bio Handle

Enhance rejuvenation by the use of positive and negative micro-current that activate energy that release skin cells so that rapid synthesis of fibroblasts collagen and skin elasticity. Muscle tension is stimulated and increased, gradually eliminate wrinkles and prevent skin aging, restoring skin elasticity and facial improvement.

Radio Frequency Handle Piece for Face

A capacitive coupling electrode is used for transmitting radio-wave energy and generating an electric field for entering into subcutaneous tissue through the skin surface. In the high- frequency of 450khz, this electric field changes its polarity for 450,00 times per second.
